SUMMARY

AI Engineer with hands-on experience designing multi-agent LLM systems, RAG pipelines, and end-to-end automation workflows. Built OrchestratorFlow, a five-agent code generation system with 88% success rate (published at NGAISL2026), and Gwen, a production RAG chatbot live at gwen-xi.vercel.app. Proven ability to convert complex business workflows into reliable, measurable, and scalable AI-powered systems.

TECHNICAL SKILLS

- **AI & LLMs:** LangChain, LangGraph, LangSmith, OpenAI/Anthropic/Gemini APIs, Groq, Ollama, RAG (Hybrid/Reranking), React
- **Automation:** n8n, Zapier, FastAPI, REST APIs, Webhooks, Docker, VPS, Linux
- **ML & CV:** PyTorch, Scikit-learn, YOLOv8, OpenCV, ResNet-50, Grad-CAM, HuggingFace
- **Stack:** Python, Node.js, JavaScript, React, PostgreSQL, MongoDB, Pinecone, Supabase, Git

EXPERIENCE

AI/ML Engineer Trainee | Campaigning Source Pvt. Ltd. | Sep 2025 – Mar 2026

- Deployed AI automation pipelines integrating LLMs with business workflows, reducing manual processing time by 40%
- Built multi-step prompt chains with CoT reasoning to eliminate hallucinations in client-facing outputs
- Integrated LLM APIs with n8n for end-to-end task orchestration and automated context injection
- Developed guardrails ensuring 95%+ deterministic output reliability in production environments

PROJECTS

Mini-GPT: Decoder-Only Transformer

- Built 1.2M-parameter transformer from scratch using PyTorch; implemented multi-head self-attention and layer normalization.
- Trained on TinyStories; optimized loss curves and maintained modular codebase with companion repository.

OrchestratorFlow | Multi-Agent LLM Code Generation System

- Architected multi-agent framework using LangGraph to define state machines, improving agentic reliability and debugging via LangSmith tracing; achieved 88% task success rate.
- Implemented dynamic routing based on agent evaluation to reduce runtime errors by 73.5%.
- Published and presented at NGAISL2026, NITRA Technical Campus, demonstrating superior reliability and scalability through modular, specialist-agent coordination.

Gwen Production RAG Chatbot | FastAPI + React + Pinecone + MongoDB + Gemini/Groq • Live: gwen-xi.vercel.app

- Built and deployed full-stack RAG chatbot acting as a digital twin live in production.
- Engineered Advanced RAG pipeline using hybrid search and reranking for improved retrieval accuracy; optimized latency with semantic caching.
- Deployed on VPS with Docker + Nginx; integrated Groq for 10x faster inference on fallback queries

Textile Defect Detection | ResNet-50 + Grad-CAM + AITEX Dataset

- Fine-tuned ResNet-50 on textile defects achieving 94% accuracy; applied Grad-CAM for explainability.

PUBLICATIONS & RESEARCH

- "OrchestratorFlow: Multi-Agent LLM Code Generation System", NGAISL2026.
- "Textile Defect Detection using ResNet-50 & Grad-CAM", NITRA Conference 2026.

COMPETITIONS & HACKATHONS

- Hacknovate 5.0: Developed a weather forecasting dashboard, collaborating with a team of 4 to deliver a scalable solution.
- EDU Chain: Built an NFT marketplace on blockchain, demonstrating rapid prototyping and team collaboration within 24 hours.

EDUCATION

B.Tech Computer Science (AI & ML) NITRA Technical Campus, AKTU2022 – 2026

- Relevant: Machine Learning, Deep Learning, NLP, Computer Vision, DSA
